Subject: Water Monitoring Data

Mike-

I just talked to Ken Wyatt relative to a couple of water monitoring issues at West Ridge;

1) Karla has been discussing with Ken Wyatt a concern that she cannot get to WR-1 and WR-2 due to a locked gate (someone superglued the key slot on the lock) plus the fact that Penta Creeks does not want people on their ground during hunting season (some sort of private game reserve thinking). This puts you guys in a difficult situation, if she can't get in to take samples. You may want to discuss this with her.

The permittee has certain rights relative to the procurement of hydrologic data as it relates to the extraction of the mineral resource. You may want to make Penta Creeks aware of your rights.

2) As you have probably read the September inspection report, there has not been a release issued by West Ridge giving the Division the go ahead to upload your submitted water monitoring data. This needs to be a letter, presumably from you, that says the data is OK to enter. WR-1 and WR-2, which were sampled on 6/26, have yet to be entered into the database, due to a lack of your OK to upload the data. Could you please address this ? Thanks.
